Reference Letter

To Whom It May Concern,

It is with great pleasure that I write this letter of recommendation for Lukas Galeta, who worked with us for a period of eight months. During this time, Lukas consistently demonstrated a high level of professionalism, technical expertise, and a strong commitment to delivering quality results.

Lukas holds a Master's degree in Data Science and brought a solid foundation of analytical and programming skills to our team. He worked independently and in a highly structured manner, producing reliable and insightful outcomes. His ability to self-organize and manage tasks efficiently was evident from the outset, and he quickly became a valued member of our team.

One of Lukas' key projects involved the revision of a reporting tool using RStudio, where he has shown both his technical proficiency and his attention to detail. Additionally, he applied his Python skills to develop a model of client behavior in relation to interest rate developments and to support business intelligence analysis. His work was not only technically sound but also demonstrated a clear understanding of the business context.

Lukas is genuinely interested in the work he undertakes. He is open-minded, communicates fluently in English, and integrated seamlessly into our team environment. Due to his very good performance and the quality of his contributions, we were pleased to extend his initial contract.

We are more than satisfied with Lukas work and would gladly welcome him back to our team at any time. I am confident that he will be a valuable asset to any organization he chooses to join.

Please feel free to contact me should you require any further information.

Sincerely,

A handwritten signature in black ink, appearing to read 'Christian Schnegg'.
